

Credit Karma Email Developer-Coding Assignment

Hi there, thanks for taking out the time to work on this assignment!

In this exercise, we would like you to build a mobile responsive email.

The design file named 'ck-export-images' is attached herewith. The hero is with one image with live text on top.

Please code this email in the hybrid/spongy style with media queries for progressive enhancement. Make sure the email renders across all major clients. Don't worry about custom fonts, just use your choice of system fonts.

Hope you have fun working on this assignment. We look forward to seeing your work soon!
